MARMAK

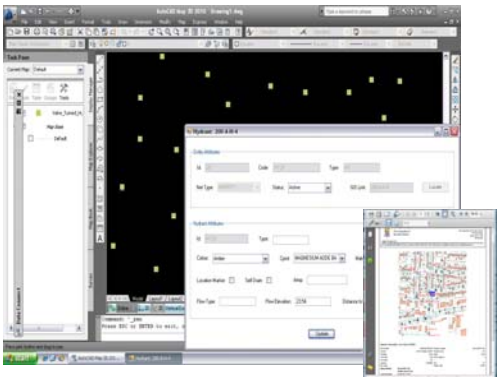
INFORMATION TECHNOLOGIES

FIELDCREW

Marmak's FieldCrew built in partnership with municipalities offers an integrated desktop and mobile solution to Create, Update, and Manage paper and digital engineering data.

FieldCrew is a cost effective solution designed to assist small to mid size municipalities wishing to maximize their investment in Autodesk, Microsoft SQL, and legacy engineering data including MIDS.

Autodesk Integration



Integrated custom built forms within Autodesk Map 3D or Civil 3D maintain engineering assets such as water, roads, and sewers.

Engineering technicians can now edit, update and create municipal assets from a variety of sources including; ESRI, SQL, and MIDS.

Mobile GIS

Municipal mobile staff now have immediate access to updates and edits made at the desktop by drafting technicians.
